

PRODUCT ANNOUNCEMENT:

SX50 Control box modifications

Date: 16th of march 2023

The SX50 control box power connections will be modified from internal to external connection points. This change has been done to accommodate better, faster, and easier installation for our customers.

Affected article number:	Supplied with thruster models:
CONT-SX50-12V	SX50/140-12V-50MM / SX50/140-12V-50POD
CONT-SXP50-12V	SXP50/140-12V-50MM / SXP50/140-12V-50POD

Effective date: 15th of May 2023

The changes will be implemented on all SX50 thruster models, including all OEM variants.

The new products will be delivered on all orders with a delivery date after the 15th of May.

The new products will be marked with a new revision number.

Please contact us if you have any questions.

Illustration above shows the dimensions of the two terminals. The only difference is the bolt hole diameter. For the correct installation of the power cables, two different markings/guides have been added.

1. Terminals are stamped with + or -.
2. Rubber sealing for the "+" terminal is red and for the "-" terminal it is black.
